Full Stack Developer with experience in JavaScript, React, Redux, Node.js, Express, PostgreSQL. My professional career includes participation in group and individual projects, which has allowed me to acquire a deep knowledge of Full Stack development, with specialization in the Backend. In addition to my experience in software development, I have a Bachelor's degree in Genetics and Biotechnology. I am committed to continuous learning. I am comfortable working in agile environments using methodologies such as SCRUM, and I have experience using tools such as GIT for version control. Additionally, I have knowledge of data structures, algorithms and CSS frameworks.
